Education and Therapy Gardens for Impaired Adult
2023-2-RO01-KA210-ADU-000173575 2023-2025

Titlul proiectului: Education and Therapy Gardens for
Impaired Adult, 2023-2-RO01-KA210-ADU-000173575
Beneficiar: ZONA INTEGRARE EUROPEANĂ
Activity - Therapeutic gardens

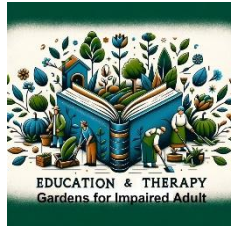

Through this activity, we aimed to convey to vulnerable people and people with different disabilities that when they work together and knead the earth with their own hands, they will feel comfort, good mood and appreciation

- The people participating in the activity are adults who have left the workforce but whose years of hard work have left deep traces.

We started with the presentation of the Erasmus + Project, the activities seen in Poland, and the presentation of the raised layers.

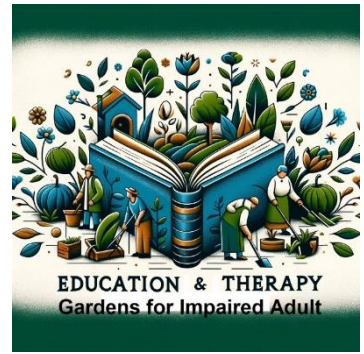

CE SUNT GRADINILE HOBBY URI? Ce este Permacultura?

"grădină hobby" se referă la grădinăritul practicat ca o activitate recreativă și o pasiune personală

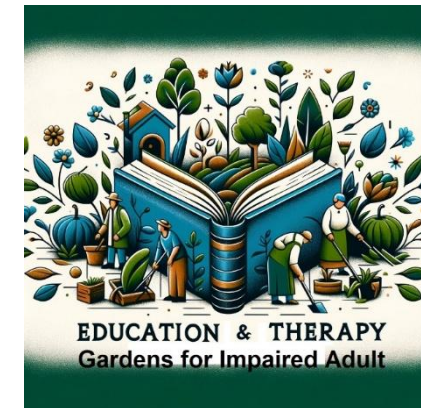

Permacultura este un sistem de proiectare a spațiilor de locuit și a sistemelor agricole care imită ecosistemele naturale,

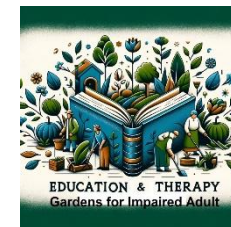

Examples of good practices!

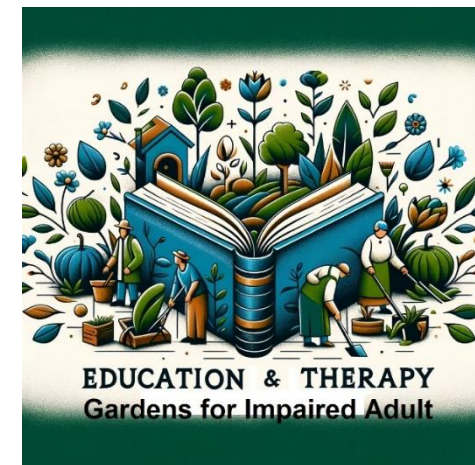

In the summer our garden bore fruit.

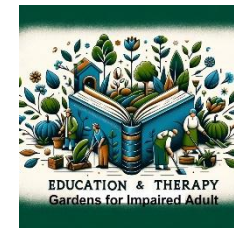

And because autumn has arrived, we invited the participants to go to the garden to gather the last remaining aromatic herbs in the raised garden.

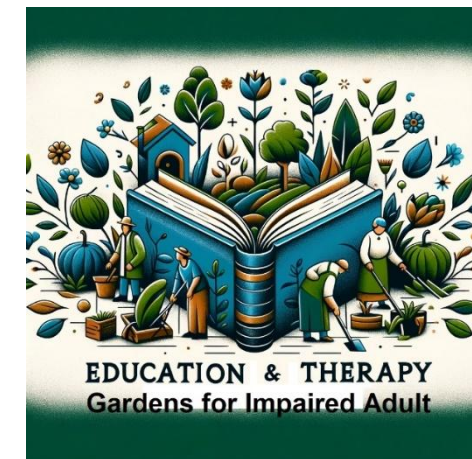

We gathered the last plants from the garden and went to transplant them into pots to enjoy green, aromatic plants as much as possible!

And green flooded the yellow face of autumn!

We were happy and grateful for this day spent together!

Thank you Erasmus+
